17 Urgent Demands of Pacific Feminists Defending the Living Planet

Pacific feminists are at the forefront of urgent struggles for climate, ecological, economic, social justice, and human rights.

Please join us for a public forum featuring a discussion of 17 demands by Pacific feminists who have been organising for decades to call for systemic change to protect Pacific people, land, oceans, and our future. These demands are grounded in lived realities and the wisdom of generations of Pacific people. They reflect a vision for equity, ecological balance, sovereignty, justice, and liberation.
